

Net Technologies

Site Survey & Site Acceptance Services

Net Technologies offers Site Survey & Site Acceptance services for the telecommunication industry with technologies such as GSM, UMTS, LTE, TETRA and WiMAX. We have more than 10 years of experience in delivering these services for the main telecom vendors globally. To guarantee the highest level of quality for the services delivered we have developed our own methodology and toolset, S-ProM.

Site Survey & Site Acceptance Services

- Visual inspections (location, access, infrastructure)
- Frequency & interference measurements
- RF site survey
- Site folder preparation
- Site acceptance

We offer

- Turn-Key projects: we deliver on a lump sum turn key basis, any roll-out, any duration.
- Time/Item based service: we deliver any implementation on month/site/cluster basis.
- Consulting services

S-ProM is part of a full range of services that provide solutions for the whole life cycle of the implementation of the access part of any wireless network.

Methodology and Toolset (S-ProM[©])

Our complete Site Survey & Site Acceptance Methodology and Toolset (S-ProM) is an integrated, vendor independent approach, for all current mobile technologies.

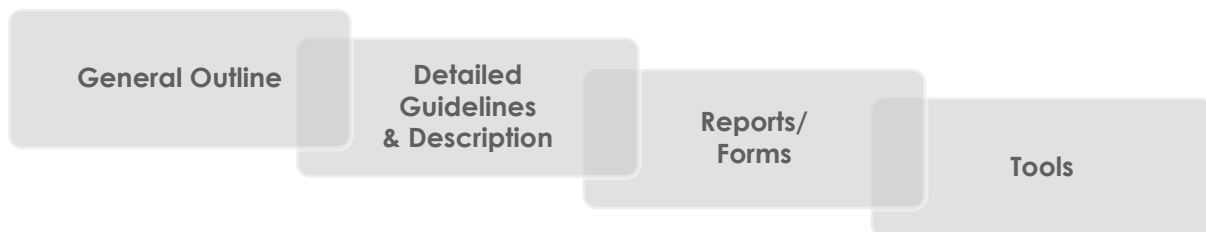

- Site survey pre-analysis task list
- Site access, as build, site inspection, site surveys
- Visual inspections procedures
- Site survey check lists
- Frequency & interference measurement procedures
- Description of site survey tools & equipment
- In compliance with Net Technologies ISO 9001:2008 certified quality system

Key Features

- Step by step instructions for the optimum sequence of work
- User-friendly and user-defined input forms
- Complete set of task lists, check lists and site survey report templates
- Applies to all current mobile technologies and all main vendors

S-ProM, a process based methodology and documented best practice, covers all the processes, procedures and needed reports for the delivery of the service of site survey & site acceptance.

The method is composed of:
