

EDITORIAL

Welcome to our 3rd online Newsletter! ✨

As we step into 2025, we're excited to share updates from Net Technologies Finland. This year started dynamically with projects and conferences and we are very excited about what's more to come!

Our recent participation in the 450 MHz Alliance Event in Saudi Arabia has enriched our insights into private networks and digital transformation. Joining the 450 MHz Alliance opens up opportunities for collaboration with industry leaders.

We're also engaged in significant projects as we continue to enhance technology and infrastructure for safer societies and innovative workplaces, showcasing our commitment to advanced telecommunications solutions.

Additionally, we're thrilled to launch the simulation tool as part of the S3SF project to promote energy savings through smart systems—vital for a sustainable future.

We appreciate your support and look forward to sharing more news in our upcoming newsletters!

The Net Technologies Finland Team 

Aramco Digital and 450 MHz Alliance Event

NETFI attended the 450 MHz Alliance Event in Saudi Arabia, hosted by Aramco Digital. This exclusive event brought together global leaders to discuss innovations in private and industrial networks, as well as the role of digital transformation in advancing connectivity for businesses. The team gained valuable insights and knowledge on the latest developments in private network technologies. We look forward to implementing these learnings in our own services and continuing to stay at the forefront of innovation in the industry.

NETFI Joins the 450 MHz Alliance

Net Technologies is pleased to announce its recent membership in the esteemed 450 MHz Alliance, a global industry organization that brings together prominent stakeholders committed to maximizing the potential of the 450 MHz spectrum.

As a leader in spectrum innovation, the 450 MHz Alliance spearheads initiatives designed to fully leverage this vital frequency band, enabling its members to achieve significant outcomes. The alliance works to highlight the opportunities within the 450 MHz spectrum and offers resources to help its members reach their objectives.

This development presents an exciting opportunity for Net Technologies to collaborate with industry leaders, share knowledge, and drive progress within the 450 MHz sector. Through this partnership, the company aims to shape the future of connectivity by creating innovative solutions that have a transformative impact across various industries.

Stay tuned for updates as we leverage this membership to continue delivering outstanding solutions in the 450 MHz space!

EU Proposal Call for Collaboration

Net Technologies is actively seeking to engage in EU-funded projects and collaborate as a key partner within consortiums, demonstrating our commitment to innovation through participation in various initiatives. Our focus areas include pivotal areas such as Digital Transformation, Wireless Communications, Security and Protection, and the development of Smart and Safe societies, merging technologies like IoT, AI, and Cloud Applications, Energy Efficiency and Mobile Applications. We are also interested in fields of Social and Gender awareness, education, Digital humanism, cultural heritage and end-user training.

By partnering with other stakeholders, we aim to propel impactful research and development efforts that advance both society and technology.

In case you are looking for consortium partners, contact : evita.gavala@nettechn.com.

S3SF Simulation Tool Launched

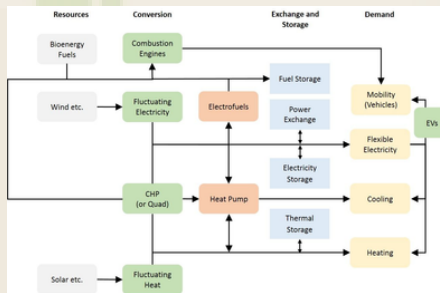

Curious about the potential energy savings from smart energy systems?

Try the simulation tool hosted on the S3SF website, the Erasmus+ funded project we participate. The tool allows the user to easily see and calculate possible savings, incorporating the latest advancements in smart energy technology and offering precise recommendations.

By simulating energy savings, you can experiment with various scenarios and make well-informed choices about adopting smart energy systems. Join us in shaping a more sustainable future by testing out our simulation tool today. 💚💡

NETFI at BAPCO 2025 in Coventry

We are thrilled to be attending for the the BAPCO event in Coventry, UK on 4th and 5th March 2025! 💡

The BAPCO Annual Event offers an unparalleled opportunity to discover the latest equipment and systems, gain insights and knowledge that directly impact your day-to-day role and network with like-minded individuals. The NETFI team is excited to visit for a second year in a row at this event, taking part in presentations and interactive workshops.

Hope to see you there. 🍷

DID YOU KNOW?

Laskiainen, also known as Shrove Tuesday, is a traditional Finnish festival that marks the beginning of Lent. Celebrated in February, Laskiainen is a time for outdoor fun and festivities, with one of the main highlights being sledding and sliding down snowy hills.

Families and friends come together to enjoy the winter weather and to race down the slopes. In addition to sledding, Laskiainen celebrations also feature traditional foods such as pea soup and laskiaispulla, a sweet bun filled with whipped cream and jam.

Throughout Finland, communities host their own Laskiainen events, offering a chance for people of all ages to come together and enjoy the winter season. The festival is a beloved tradition that brings warmth and joy to the cold winter months, making it a special and cherished time for all who participate.
