

EDITORIAL

Welcome to our 4th online Newsletter! 

As we move further into 2025, Net Technologies Finland continues its dynamic journey through innovation, collaboration, and meaningful engagement in global and European initiatives.

We're thrilled to be attending Critical Communications World 2025 in Brussels, where we'll explore the latest in broadband, MCX, AI, and more — always seeking fresh ideas and stronger connections.

Meanwhile, our technical teams remain active on multiple fronts, from wireless design in Saudi Arabia to capacity building in smart energy systems through the S3SF project. We also proudly welcomed a young entrepreneur from Spain through the Erasmus for Young Entrepreneurs program — a great exchange of knowledge and inspiration that energizes our mission.

As always, thank you for being part of our growing community. Stay tuned for more updates soon!

The Net Technologies Finland Team 

NETFI is Attending CCW 2025 See You in Brussels!

We're excited to announce that Net Technologies Finland will be visiting Critical Communications World 2025 this June in Brussels!

CCW is one of the most important global events in the field of mission-critical communications — bringing together experts, innovators, and organizations from around the world.

As visitors, we're looking forward to engaging with the latest developments in broadband, MCX, AI, satellite tech, and much more.

Our team is eager to connect with industry peers, exchange insights, and bring fresh inspiration back to our work here at NETFI. Events like these help us stay at the forefront of innovation and ensure we continue delivering smart, reliable solutions to our clients and partners.

Are you attending too? Let's meet up in Brussels!

Participation in the 450 MHz Alliance Working Groups

As members of the 450 MHz Alliance, we are pleased to actively participate in the Standards & Regulatory Working Group and the Technical Working Group. These groups regularly convene online to discuss current challenges, objectives, solutions, and industry events.

In 2024, these Working Groups have been instrumental in delivering value to 450 MHz Alliance members. They play a vital role in keeping members informed about the latest industry developments, technological advancements, and regulatory updates. Additionally, they provide insider insights into the ecosystem from various perspectives.

Together, these groups facilitate idea exchange, foster collaboration, and ensure members are well-equipped to adapt to the rapid changes in the industry—enhancing their ability to leverage the 450 MHz spectrum effectively.

For more information about the 450 MHz Alliance visit:

S3SF Training Delivery and Capacity Building 🌟🌍

One key part of the S3SF Erasmus+ funded project is the delivery of the training and building capacity in the field of smart energy systems.

The S3SF consortium has been actively building a robust network of training centres and partnerships with vocational education providers across Europe, encouraging collaboration and sharing best practices. 🍀

Our goal is to create a vibrant community of trained professionals, accessible resources, and ongoing support — all aimed at shaping a sustainable energy future! 🌱 Importantly, we're dedicated to inclusivity by encouraging participation from underrepresented groups, ensuring a diverse and equitable workforce ready to lead the way in smart energy solutions.

Together, we're building a skilled, innovative, and inclusive community committed to advancing sustainable energy across Europe. 🏡

🌟 NETFI x Erasmus for Young Entrepreneurs Welcoming Fresh Ideas

This spring, Net Technologies Finland had the pleasure of participating in the Erasmus for Young Entrepreneurs program — an EU initiative that connects aspiring entrepreneurs with companies across Europe.

For one month, we had the opportunity to host Daniel, a young entrepreneur from Spain with a passion for digital innovation and a keen interest in the tech industry.

During his time with us, Daniel explored how artificial intelligence can be applied in traditional business settings.

His fresh perspective brought great value to our team, and we truly enjoyed this collaborative learning experience.

(Thank you, Daniel, for your contribution — we wish you all the best on your entrepreneurial journey!)

EU Proposal Call for Collaboration 🇪🇺

Net Technologies is committed to active participation in EU-funded initiatives and to establishing itself as a strategic partner within consortiums, reinforcing its dedication to innovation, security, and collaborative progress.

We focus on key areas including Digital Transformation, Wireless Communications, Security and Protection, and the creation of Smart and Safe societies, leveraging cutting-edge technologies such as IoT, Artificial Intelligence, Cloud Computing, Energy Efficiency, Mobile Applications, and next-generation connectivity solutions like 6G.

Our company also strongly commits to Social and Gender Awareness, Education, Digital Humanism, Cultural Heritage, and End-User Training.

By engaging with a wide range of stakeholders, Net Technologies aims to drive impactful research and development activities that contribute to societal progress, technological advancement, and European strategic autonomy.

🌟 Vappu: Finland's Joyful Welcome to Spring 🌟

Vappu, celebrated on May 1st, is one of Finland's most anticipated holidays—a cheerful blend of International Workers' Day and the arrival of spring. The festivities begin on April 30th, highlighted by the traditional capping of the Havis Amanda statue in Helsinki.

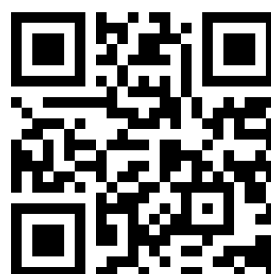

Students in colorful overalls and classic white caps bring a playful energy to the streets with parades and parties, while families gather for relaxed May Day picnics. On the menu: sweet sima, crispy tippaleipä, and freshly made donuts.

Both festive and meaningful, Vappu is a wonderful expression of Finnish culture, community spirit, and the joy of warmer days ahead.
